- He was truly incredible. I am so grateful for this class to have been my introduction to coding and led by Jacob. He also took time to make sure that each of us students felt supported and was extremely understanding when it came to extensions and so forth. He was enthusiastic about teaching us and guiding us through our projects.
- Amazing!! Lowkey wish I could have just taken his part of the class.
- Jacob is one of the best TA in my college year! He put so many efforts into the lab content and assignment. He really tried to make them be useful for us future work and help us get the best out of it.
- Jacob was a phenomenal TA. His dedication and commitment to the students was astoundingly evident, and honestly inspiring. He clearly poured so much time and thought into assignments and labs and made the experience very enriching for students, especially for students at varying levels of experience with R/coding. He is a such a genuine and compassionate person and teacher. Any student would be more than lucky to have him as TA!

2 - What is the overall teaching effectiveness of Jacob Edwards?
